THE WORLD CUP FINAL REPLAY (CAN HISTORY REPEAT ITSELF?) -
A COMPARISON OF FLOODPLAIN MANAGEMENT PRINCIPLES AND PRACTICE
IN NSW AND GREAT BRITAIN

ALLAN GEAR & AMY HENSLER

Atkins Water, UK

Allan Gear

Allan Gear has recently returned to Australia after 6 months in UK as Principal Engineer/Project Director, Flood Risk Management with Atkins, an EA framework consultant, which boasts over 14,000 staff. His field of operations included floodplains, rivers and estuaries in the south-east of England. He admits to over 25 years experience in local government and consulting, and specialises in catchment, floodplain and riverine management, urban stream rehabilitation, civil and environmental engineering designs for urban infrastructure, strategic landuse planning and local government policy and practice.

Amy Hensler

Amy Hensler has worked as a Hydrologist with Atkins for 4 years. She has experience in flood hydrology, flood risk mapping and flood risk assessment, and is currently undertaking flood defence strategies for a number of large catchments in the south-east of England. Amy has expertise in hydraulic modelling and GIS, and has a real interest in the interaction between geomorphic assessment and flood behaviour.
